

EXPERIO | *Roche*

Inquisitive minds welcome!

Where **curiosity** *meets* **purpose**

EXPERIO Roche – excites, inspires, motivates.

Programming Lego robots, soldering electronic circuits, chemical synthesis, understanding the processes of molecular biology, quantitative analytics or advice on the choice of a career: Housed in the F. Hoffmann-La Roche Ltd Learning Center in Kaiseraugst, the EXPERIO Roche facility offers unlimited possibilities.

The EXPERIO Roche school laboratory offers a wide range of workshops in the areas of IT, science and technology. The workshops can be booked online.

During their visit to the school laboratory, the children take an in-depth look at the chosen topic and have the opportunity to combine theory with practice in a professional work environment.

Staff with a training background from the individual areas guarantee a professional experience.

Curiosity

We promote interest and provide impetus. Because we want young people to benefit from positive key experiences and early exposure to the world of work.

A summary of what's on offer

STEM Workshop

Schoolchildren in primary school class 4 and above are given insights into the STEM fields of information technology, science and engineering.

Specialist workshop

Secondary-level schoolchildren are given in-depth insights into individual STEM disciplines. They can select between IT, science and technology topics.

MyTalents – choosing a career

Schoolchildren at the stage of choosing a career (classes 7 and 8) can discover their practical talents here.

Additional options

Do you work in careers guidance or teaching, or as a lecturer at a teacher training college and are you interested in further training? We would be delighted to help you organise an event specially designed for you and your participants.

All our services can be booked on our website www.experio-roche.ch

EXPERIO Roche is housed in the Learning Center in Kaiseraugst, an ultra-modern, ground-breaking trainingbuilding that provides the ideal environment for gearing Roche's vocational training activities even more closely to the needs of trainees and the specialist departments within the company.

Vocational training at Roche

Every year around 100 apprentices successfully complete their courses at Roche Basel in 15 attractive, future-oriented professions. Further careers information, detailed documentation on our apprenticeships, information on trial apprenticeships and application forms can all be found at www.berufslehre.roche.ch
