Explore and discover.

## Experio Roche – inspires, promotes and ignites interest.

Embedded within the Learning Centre of the company F. Hoffmann-La Roche AG in Kaiseraugst, the Experio Roche school laboratory offers a wide range of workshops in the fields of computer science, natural science and technology, as well as different career choices. The school laboratory therefore promotes interest, provides impetus and unlocks important positive experiences.

During their visit at the school laboratory, children engage with the selected topic and have the opportunity to combine theory and practice in a professional working environment. Specialists with educational qualifications ensure that professional support is provided during the workshops.

# An overview of what is on offer

## STEM Workshop

Primary school pupils are given an insight into STEM fields such as computer science, natural science and technology.

## myTalents career choice workshops

Students who are at the point of choosing a career (classes 7 and 8) can discover their practical talents here. Your class can use the myTalentsOnline service if you are unable to visit us on-site.

## Further training

We offer a wide range of further training courses on STEM and choosing a career for interested teachers.

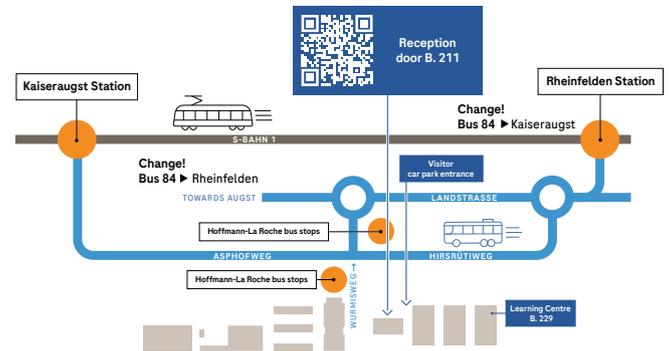

## Additional services

For careers advisers, teachers, students and lecturers at teacher training colleges, we offer customized services on request in the field of STEM or on the topic of choosing a career.

All services offered by the Experio Roche school laboratory can be booked via our website: [experio-roche.ch](http://experio-roche.ch)  
All the courses we offer are in German only.

## How to reach us

The Experio Roche school laboratory is located within the Learning Center in Kaiseraugst. A state-of-the-art, forward-thinking training facility where excellent conditions have been created to help align Roche's Vocational Education and Training even more closely to the needs of apprentices and subject areas.

## Vocational Education and Training at Roche

At Roche Basel, around 100 apprentices successfully complete their vocational training in 15 attractive and pioneering professions every year. Further information on apprenticeships, vocational information, career tasters and the application process can be found at [basel.lehre.roche.com](http://basel.lehre.roche.com)
